

# Econometrics

## Revision

SILC Business School, Shanghai University

# Chapter 1

- Data Structure
  - Cross Section

# Chapter 1

- Data Structure
  - Cross Section
  - Time Series

- Data Structure
  - Cross Section
  - Time Series
  - Pooled Cross Section

- Data Structure
  - Cross Section
  - Time Series
  - Pooled Cross Section
  - Panel Data

- Formula of  $\widehat{\beta}_1$
- SST, SSE, SSR
- Interpretation of log transformation
- Population Regression Function versus Sample Regression Function
- $\mu$  versus  $\widehat{\mu}$
- Zero Conditional Mean

- Gauss Markov Assumption 1-5, Best Linear Unbiased Estimator (BLUE)
- Consequence of Heteroskedasticity: unbiased estimates but larger variance
- What is White Test for (Detection of Heteroskedasticity)
