GAPS Analysis

The first phase in the development planning process is to conduct a GAPS analysis,

- 1.Goals
- 2.Abilities
- 3.Perceptions
- 4.Standards

GAPS Analysis

The first phase in the development planning process is to conduct a GAPS (goals, abilities, perceptions, standards) analysis which involves the following steps:

- Identifying your career objectives
- Identifying your strengths and development needs related to your career objectives
- Determining how your abilities, skills, and behaviors are perceived by others based on 360-feedback or performance reviews
- Determining the expectations your boss or organization has for your career objectives

FIGURE 3.3
A Gaps-of-the-
GAPS Analysis

- Designing background is preferred

•Preferred Qualifications

Demonstrated ability to formulate data driven decisions that lead to results.

- Excellent communication skills in both oral and written English.
- Bachelor Degree required, MBA preferred.

Company - Beijing Century Joyo Courier

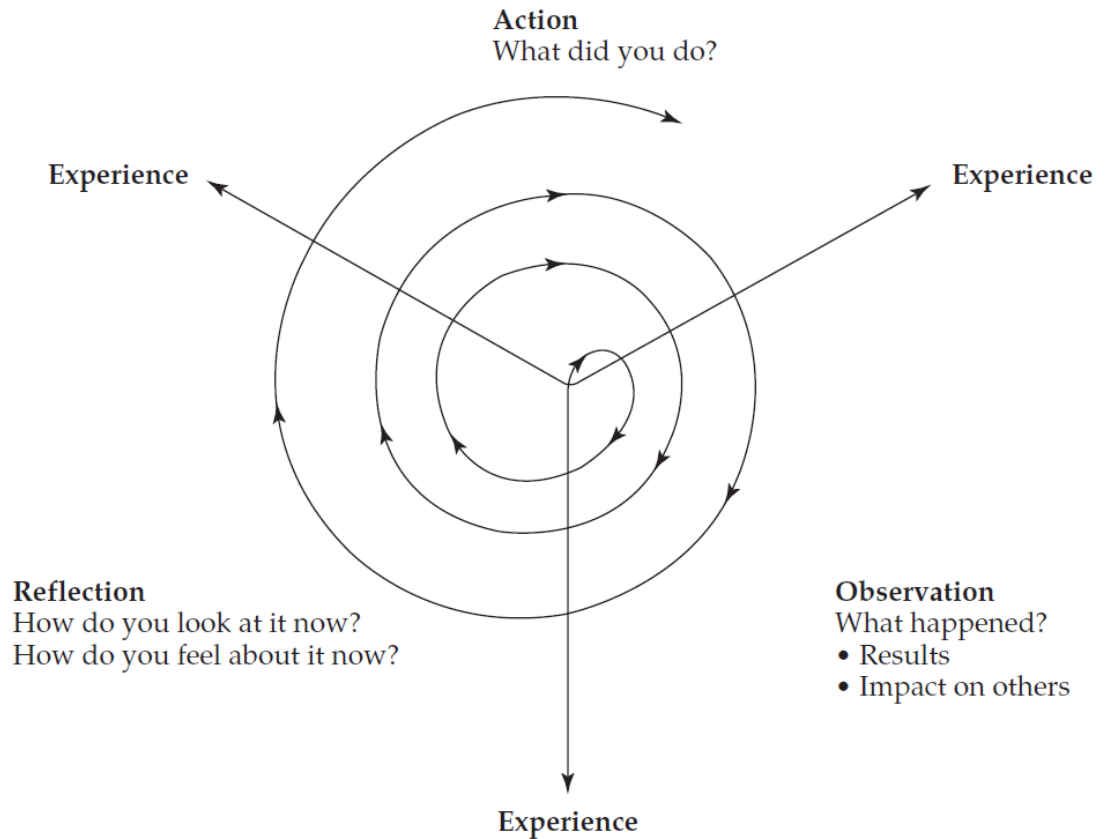

The Action-Observation-Reflection Model

- Making the most of experience is key to developing one's leadership ability.
- The **action-observation-reflection (A-O-R) model** shows that leadership development is enhanced when the experience involves three different processes:
 - Action
 - Observation
 - Reflection
- **Spiral of experience**

The Spiral of Experience

FIGURE 2.1
The Spiral of Experience

The Key Role of Perception in the Spiral of Experience

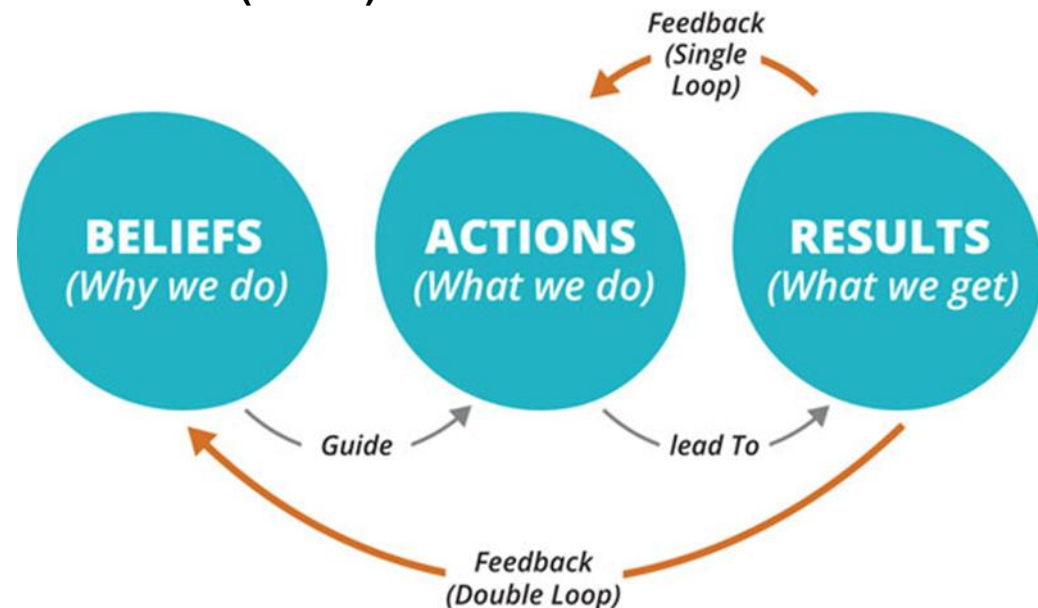

- Experience is not just a matter of what events happen to you; it also depends on how you perceive those events.
- Perception affects all three phases of the action-observation-reflection model.
- People actively shape and construct their experiences.

Reflection and Leadership Development

- Reflection offers leaders insights about framing problems differently, viewing situations from multiple perspectives, and understanding subordinates better.
- Leaders tend to ignore reflection due to a lack of time or a lack of awareness of its value.
- Intentional reflection may prompt leaders to see potential benefits in experience not initially considered relevant.

Single- and Double-Loop Learning

- **Single-loop** learners seek relatively little feedback that may significantly confront their fundamental ideas or actions.
 - Individuals learn only about subjects within the “comfort zone” of their belief systems.
- **Double-loop** learning involves being willing to confront one’s own views and inviting others to do the same.
 - Mastering double-loop learning can be thought of as learning how to learn.
 - Learning is enhanced with **after event reviews (AERs)**.

舒适区 (comfort zone)

学习区 (stretch zone)

恐慌区 (stress/panic zone)

Panic Zone

Moving too far away from comfort zone, beyond the learning zone where fear and anxiety takes over.

Making the Most of Your Leadership Experiences: Learning to Learn from Experience

- The learning events and developmental experiences that punctuate one's life are usually stressful.
- Being able to go against the grain of one's personal historical success requires a strong commitment to learning and a willingness to let go of the fear of failure.
- To be successful, learning must continue throughout life and beyond the completion of one's formal education.

Leader Development in College

- The number of college-level leadership studies programs is rising, but few programs offer academic credit, such as academic minors.
- Leadership programs should be multidisciplinary and should cultivate values through **service learning**.
- Program elements might involve **individualized feedback** to students.
- **Case studies, role playing, simulations, and games** provide opportunities for self-discovery and practice.

Leader Development in Organizational Settings

- Organization-based leadership programs benefit both the individual and the organization.
- The **return on investment** (ROI) for investments in leadership development are both positive and substantial.
- Most programs are aimed at leaders and supervisors in industry and public service.
- Program content depends on the organization level of participants:
 - First-level supervisors
 - Mid-level managers

Leader Development in Organizational Settings (cont.)

- Programs for first-level supervisors use lectures, case studies, and role-playing exercises to improve supervisory skills:
 - Training
 - Monitoring,
 - Giving feedback
 - Completing performance reviews

Leader Development in Organizational Settings (cont.)

- Mid-level manager programs use individualized feedback, case studies, presentations, role playing, simulations, and in-basket exercises to improve the following:
 - Interpersonal skills
 - Oral and written communication skills
 - Time management skills
 - Planning
 - Goal setting

Leading Leaders

(Ministry Director)

- team building
- evaluating & motivating others
- decision making
- leading meetings

Leading Self

(All Leaders & Volunteers)

- know yourself
- managing your time
- setting personal goals
- effective personal communication
- spiritual disciplines

Leading Organizations

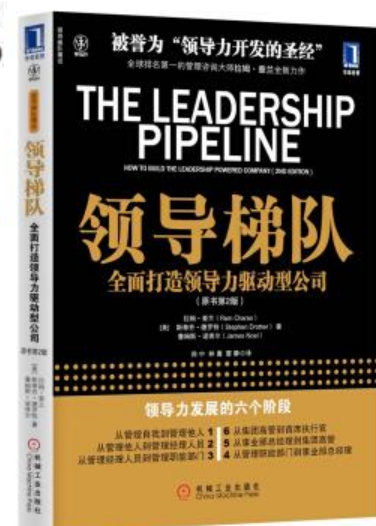

(Senior Leadership)

- casting vision
- executing
- successful planning
- empowering others to lead
- organizational clarity
- effective public communication

Leading Followers

(Leader)

- planning skills
- influencing others
- conflict resolution
- servant leadership
- recruiting leaders

Action Learning

- Traditional **training programs** involve personnel taking leadership classes during work hours.
- Such training addresses common leadership issues, but its artificial nature makes it difficult to transfer concepts to actual work situations.
- In contrast, **action learning** involves the use of actual work issues and challenges as the developmental activity itself.
- The philosophy of action learning is that the best learning involves learning by doing.

Group Discussion

Coaching vs Mentoring

Mentoring

- In an organization, you can gain valuable perspectives and insights through close association with a **mentor**—an experienced person willing to take you under his/her wing.
- **Mentoring** is a personal relationship in which a more experienced mentor (usually someone 2-4 levels higher in an organization) acts as a guide, role model, and sponsor of a less experienced **Mentee**.
- **Mentors** provide **Mentees** with knowledge, advice, challenge, counsel, and support about career opportunities, organizational strategy and policy, and office politics.

Coaching

- Coaching is a key leadership skill that can help leaders improve the bench strength of the group and retain high-quality followers.
- **Coaching** is a thought-provoking and creative process that inspires clients to maximize their personal and professional potential, by asking powerful questions rather than providing direct solutions.

The GROW Model

G

GOAL

What do you
want?

R

REALITY

Where are
you now?

O

OPTIONS

What could
you do?

W

WAY

What will
you do?

G_{oal}

What do you want?
What will that get you?
What is exciting about this goal?
What's even more important than this goal?
How will you measure the results?
What does success look like?
What's the big picture?

R_{eality}

How are things going right now?
How do you feel?
What values and needs are most important?
What is the biggest concern?
What resources are available?
What barriers do you face?
What does the resistance really mean?

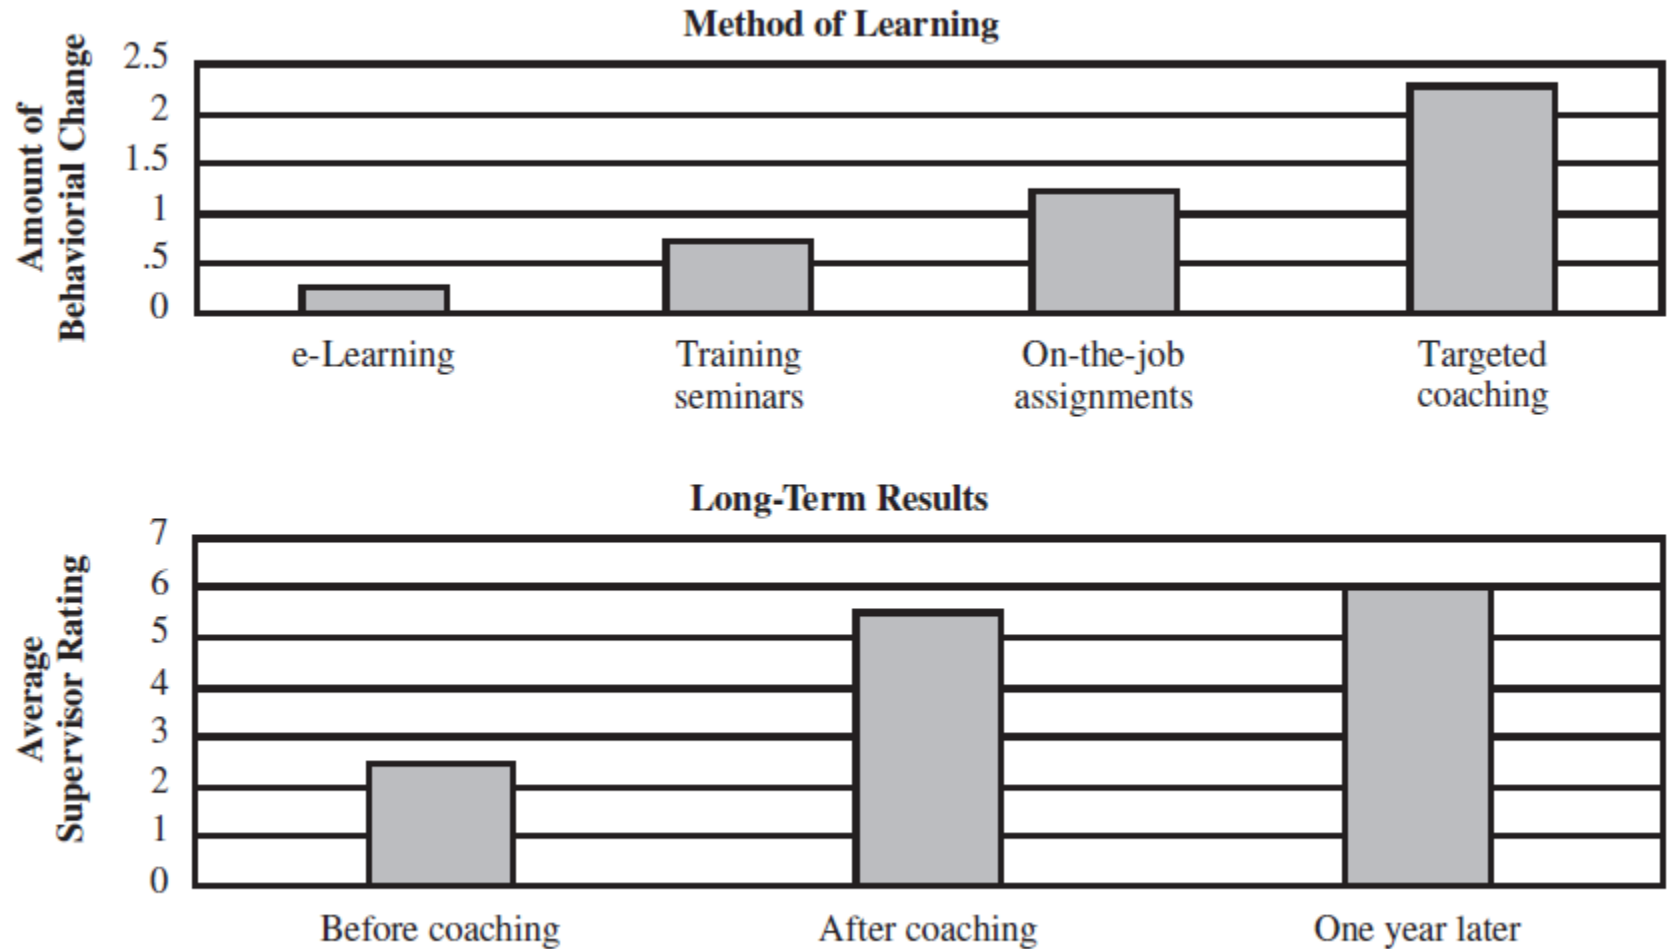

O_{ptions}

What are some of the ways you could approach this issue?
Would you like to brainstorm some options?
In your wildest dreams, what strategies would you choose?
If you had more money, time or authority, what would you do?
What if you could start all over?
What are some of the advantages and disadvantages of each option?

W_{ay}
Forward

Which option is your best choice?
When will you get started? What's the first step?
What else do you need to do?
On a scale of 1-10, how committed are you to this plan?
What would take you to a ten?
What accountability structures would support you?
How will you celebrate success?
